### **Overview**

#### Tennessee Instructional Leadership Standards (TILS)

Recognizing the importance of engaging in a continuous improvement process, Tennessee seeks to transform what it means to be an effective instructional leader at all phases of a leader's career. This aim is accomplished by setting high standards for effective leadership based upon research and best practices, supporting leaders to reach those standards, and empowering districts to build a network of exceptional instructional leaders who get results.

The Tennessee Instructional Leadership Standards (TILS) establish the structural framework of the Administrator Evaluation Rubric by defining a set of indicators and detailed descriptors that provide a clear set of expectations to schools and districts. The rubric is designed to help instructional leaders develop the type of leadership practices directly related to substantial gains in student achievement. Moreover, the leadership practices embedded in the indicators and descriptors are largely tied to the indirect, but vital, role and impact school leaders have on student achievement. Just as the TILS do not include separate areas to address ethical issues, the rubric does not separate these areas by indicator and descriptor. The premise is the same with the rubric as with the standards—attributes such as honesty, respect, sound judgment, commitment, fairness, compassion, work ethic, and a genuine belief that all children can learn and grow contribute to the foundation of ethical behavior connected to leadership.

#### The Administrator Evaluation Rubric is...

- Approved by the State Board of Education as a tool used to guide a fair and transparent administrator evaluation
- Developed to establish a culture of support for instructional leaders
- Intended to help engage educators in reflective dialogue among and between peers and evaluators to improve practice
- Used to support school leaders and those who support school leaders in acknowledging a leader's effective practices and results
- Supportive of a leader's opportunities for improvement, offering guidance on professional growth and learning for oneself and for other educators

#### The Administrator Evaluation Rubric is not...

- A checklist, but should be used to weigh the preponderance of evidence over time against the levels of practice defined in the indicators and descriptors
- Inclusive of all salient aspects of a school leader's role, rather it focuses primarily on the dimensions of leadership most directly linked to managing teacher effectiveness and increasing student achievement
- Meant to address areas of performance related to personal conduct as described in district and state policies

### Begin with the End in Mind: The Importance of Vision

In Tennessee, it is expected that the vision of the school, developed in collaboration with multiple partners and aligned with the district's vision, will drive the actions demonstrated in the indicators and descriptors in this rubric over time to increase student achievement. The vision provides a powerful communication and coalescing tool for all stakeholders in the school, creating a "word picture" of what is to be created and maintained. Crafting an exemplary vision requires

asking an essential question: When a vision for continuous improvement, culture conducive to teaching and learning, and professional learning and growth (standards A, B, and C) has been developed and implemented, what will be different for:

- your students?
- your teachers?
- your school?
- your parents?

An exemplary visioning process occurs when school leaders jointly develop a vision for continuous improvement, contextualized through a) a vision for a culture conducive to teaching and learning and b) a vision for professional learning and growth. The resulting overarching school vision thus exhibits and requires:

- collaboration with key partners to identify and enact clear, measurable, annual goals;
- linkage to goals that support student achievement, gap closure, and college and career readiness with evidence of growth;
- communication to nearly all stakeholders;
- modeling of personal commitment to continuous improvement and a culture conducive to teaching and learning; and
- modeling of school-wide beliefs in professional learning and growth

### Research Supporting the Administrator Evaluation Rubric

In collaboration with the superintendents', supervisors' and principals' study councils, the drafting process for the Administrator Evaluation Rubric was largely informed by administrators throughout the state whose suggestions, questions, and concerns regarding the rubric's language were strongly considered during the development of all

iterations of the draft. In addition to input from colleagues statewide, the following research supports the content of the rubric:

- American Institutes for Research's The Ripple Effect, 2012
- Georgia Department of Education's Leader Keys Effectiveness System, 2012

## Standard A: Instructional Leadership for Continuous Improvement

"Good leadership is not about you. It is about what you leave behind.... In the process of improvement, it is almost inevitable that significant barriers will arise. Great leaders learn to build trenches under barriers and find ladders to use to climb over them."
